SHREYA RANGAPPA KOTIKAL

Software Test Engineer | Manual Testing | API Testing | SQL | JIRA | Playwright (Learning)

+91-8217807225 | kotikalshreya@gmail.com | Bengaluru, Karnataka | LinkedIn

PROFESSIONAL SUMMARY

Software Test Engineer with 1.2 years of experience in manual testing of web and mobile applications, API testing with Postman, SQL database validation and defect tracking in JIRA. Skilled in functional, regression, smoke, sanity, integration and UAT testing across Agile Scrum releases. Currently upskilling in Playwright automation with JavaScript/TypeScript. Seeking a QA / Software Tester role to help deliver reliable, high-quality products.

TECHNICAL SKILLS

Testing: Manual Testing, Functional, Regression, Smoke, Sanity, Integration, UAT, Exploratory Testing, Test Case & Test Scenario Design, Test Execution, Defect Life Cycle, Bug Reporting, Test Reports, Traceability Matrix

API & Database: API Testing, Postman, Request-Response Validation, Backend Validation, SQL Queries, Database Validation, Data Verification

Tools: JIRA, Postman, Git, ADB (Android Debug Bridge), Microsoft Excel, Word, PowerPoint

Automation (Learning): Playwright, JavaScript, TypeScript, Core Java

Methodologies: SDLC, STLC, Agile Scrum, Scrum Ceremonies, Defect Triage

Gen AI: ChatGPT (hands-on), AI response validation, edge-case testing, prompt-injection scenarios

PROFESSIONAL EXPERIENCE

Software Engineer Trainee (QA) | Quintrix Software Consultancy LLP 1.1 Years

Bengaluru, India

- Performed manual testing of web and mobile applications, validating UI and functionality against business requirements.
- Designed and executed test scenarios and test cases; ran functional, regression, smoke and sanity tests across multiple application releases.
- Logged, tracked and verified defects in JIRA; supported UAT and participated in defect triage and Agile Scrum ceremonies.
- Conducted API testing in Postman to validate request-response behaviour and backend workflows.
- Tested Android app installs, upgrades and usability using ADB and debugging tools.

PROJECT EXPERIENCE

Educational Finance Management System (EFMS) | Software Test Engineer Web Application

- Analysed business requirements and prepared test scenarios and test cases for the Superadmin, Admin and Clerk modules covering institution, branch, fee, scholarship and payment workflows.
- Executed positive, negative, boundary and form-validation tests plus CRUD and business-rule checks (e.g. duplicate branch code, branch-count consistency).
- Performed functional, regression, smoke, sanity and UAT testing; validated end-to-end flows from student registration to fee collection and reporting.
- Verified APIs with Postman and data accuracy with SQL queries; raised defects in JIRA and completed retesting and regression after fixes.
- Prepared defect reports, test summary reports and traceability matrices in collaboration with developers and stakeholders.

Quest Alumni - Event Management System | QA Engineer Web Application

- Tested Admin and Alumni/User modules: event creation, update and listing, event details and registration workflows.
- Validated mandatory fields, date/time inputs and error messages using positive, negative and boundary-value testing.
- Reported defects in JIRA, performed retesting and regression testing, and verified API responses and database records.
